prost 1 Pl. The distinct Hora Box forgrown Wildlite Home Surveying protocol. People Installing Nest Boxes is one way of sup-con coveribuse to supporting Biodiversity. The dangers of relying on next boxes as a one-for-one replacement of removed national hollows is well documented and outlined (e.y by Lindersmayer in various studies). But a great many next bexes an must be put up each year simply to improve the simula hobitability is a landstage for willist. Small scale installations or make up a all up to a herene number of next bexes these. Next bexes one poor made put for landsone groups, siends groups, local councils next schools, grients citizens, there will not a land private members citizens and installations on free value property. Along within installations are to All as they note boxes require resources to put up build and inteall. back one has a 'scooping and takes time and estate. The aumulative and by estated and groups is purposely very and takes time and totalist the next boxes por up by small g tryps must be very low is large, the fotomical boxes for a set on the standards is estated. probably very large; but so is fe off me the resources & effort. Ateminsullation, were boxes in lifty of the Sindings from periors seedles. Nort-box to theper and detardument and in tight of the sinding or uptake, or uptake by non-tonget species should all be considered.

durhage, low rates of uptake, or uptake by non-tonget species should all be considered.

Some next boxes are monitored formally and others are not. For one thing, It is indeed a let of

some next boxes are monitoring protocid for three next-boxes instabled as part as an educational

effort to come up with a monitoring protocid for three resources. And when one has the informaction,

effort to come up with a heady servined volunteer resources. And when one has the informaction,

demonstration that already servined to other, groups auteoms? Having a feet energy demonstration that arready screened to other group's cottones? Having a best practice protocal and the whot then? Can it be compared to other group's rooms there is not one in place to people could help to other come these a hallonger. To my knowledge, there is not one in place to people could help to other come these a hallonger. for the Adelaide region that can be used in from Government enrough to private intellations, There is very way were citizen science efforts programy has have some kindly protocol. However, I have already paid son given some thought to a manitoring protect, and want to part there ideas writing so they can be shared and compared to other systems.
